

SAKSHI MALKAR

Pune, Maharashtra, India | sakshimalkar286@gmail.com | +91 9022211896 | linkedin.com/in/sakshi-malkar | github.com/sakshimalkar

Professional Summary

Software Developer with full-stack expertise and hands-on experience building production-deployed web applications using Python, Django, React.js, and REST APIs. Exposure to cloud platforms (Azure, AWS), CI/CD pipelines, Linux environments, and containerization fundamentals. Strong problem-solving and analytical skills with a growth mindset; experienced in cross-functional collaboration through enterprise-level industry simulations. Eager to contribute to large-scale distributed infrastructure systems.

Technical Skills

Languages: Python, Go (learning), JavaScript (ES6+), SQL, PHP, Java, C, C++

Infrastructure & Cloud: Linux, Microsoft Azure App Service, AWS Fundamentals, Git/GitHub, CI/CD, Netlify

Containerization & DevOps: Kubernetes concepts, Docker/containerization fundamentals, GitHub Actions

Backend & Databases: Django, REST APIs, MySQL, PostgreSQL, OOP Principles

Frontend: React.js, React Hooks, HTML5, CSS3, Bootstrap, Responsive Web Design

Core Competencies: Distributed Systems, Troubleshooting & Debugging, Production Issue Resolution, SDLC, Cross-functional Collaboration, SLA Adherence

Education

Smt. Mathubai Garware Kanya Mahavidyalaya, Sangli — Shivaji University

Aug 2022 – May 2025

Bachelor of Computer Applications (BCA)

Score: 74.59%

Industry Experience & Training

Python Full Stack Development Training

Jun 2025 – Present

SevenMentor, Pune

On-site

- Built multiple production-grade web applications using Python, Django, React.js, MySQL, and REST APIs; deployed to Azure App Service and AWS.
- Practiced Git-based CI/CD workflows; deepened knowledge of SQL, PostgreSQL, and backend system reliability for production operations.
- Gained hands-on exposure to cloud infrastructure provisioning, monitoring, and deployment automation workflows.

Deloitte Australia — Technology Job Simulation

Dec 2025

Forage Virtual Experience

Remote

- Simulated enterprise software workflow; produced a data-driven dashboard proposal demonstrating requirements gathering and solution design at scale.
- Practiced stakeholder-oriented communication and structured documentation aligned with production support responsibilities.

BCG GenAI Job Simulation

Dec 2025

Forage Virtual Experience

Remote

- Built an AI-powered financial chatbot using Python and pandas; applied data processing pipelines to automate business insight generation.

Python with AI Trainee

Feb 2025 – Mar 2025

Fuel Business School, Pune

On-site

- Completed intensive training in Python (Basic to Advanced) with AI integration techniques and automation scripting.

Projects

Netflix Clone | *React.js, REST API, Bootstrap, Netlify, Git CI/CD* | Live

2025

- Responsive movie browsing app integrating live REST APIs; deployed via Git CI/CD pipeline to Netlify.
- Engineered reusable React component architecture demonstrating end-to-end production deployment skills.

E-Learning Platform | *PHP, MySQL, HTML, CSS, JavaScript* | Live

2025

- Full-stack portal with PHP/MySQL backend for dynamic content management, course navigation, and cross-device responsive design.

FastAPI E-Commerce Backend | *FastAPI, Python, SQLAlchemy, MySQL, Pydantic, Swagger UI* | GitHub

2025

- Designed one-to-many relational schema using SQLAlchemy ORM; wrote optimised SQL queries with server-side pagination; applied Pydantic for data validation and auto-generated OpenAPI/Swagger docs.

Certifications

Deloitte Australia Technology Job Simulation — Forage (Dec 2025) | BCG Generative AI Job Simulation — Forage (Dec 2025) | Microsoft Azure App Service — Authentication, Deployment & Monitoring | AWS & DevOps Fundamentals — SevenMentor (2025) | Generative AI — OutSkill (2025) | Java Programming — Great Learning (2025) | React.js & Web Development — SevenMentor (2025)
